

UDITYA NARAYAN TIWARI

Jaunpur, Uttar Pradesh

✉ uditmerit@gmail.com  [LinkedIn](#)  [GitHub](#)

EDUCATION

VIT Bhopal University, Kothrikalan

B.Tech - Computer Science Engineering with AI & ML - CGPA: 9.00

2023 – Present

VIT Bhopal University

EXPERIENCE

Core Member, Matrix Media Club

Tech Team Member

Jan 2025 – Jul 2025

VIT Bhopal University

- Developed smart applications to improve communication between event hosts and clients.

Technical Member, Microsoft Learn Student Chapter

Tech Team Member & Community Admin

Apr 2025 – Apr 2026

VIT Bhopal University

- Organized technical workshops and Hackathons for Microsoft technologies.

PROJECTS

NeuroLens A Knowledge Retrieval Engine | Python, LangChain, RAG, LLMs

Jun 2026

- Developed an AI-powered knowledge retrieval system using Retrieval-Augmented Generation (RAG).
- Built semantic search and vector embedding pipelines for efficient information retrieval.
- Integrated Large Language Models with vector databases for context-aware question answering.
- Processed and indexed PDFs, documents, and web content for intelligent knowledge discovery.

Smart Medical Care For Rural Areas | Python, NLP, Flask, Transformer

Nov 2025

- Developed an AI-powered medicine recommendation system using NLP for symptom-based medicine suggestions.
- Implemented Sentence Transformers with cosine similarity and MMR ranking for accurate symptom-to-medicine matching.
- Built data preprocessing pipelines and deployed the system using a Flask backend for real-time recommendations.

Breast Cancer Prediction using ML Models | Python, Scikit-learn, Jupyter

Sep 2024

- Developed a machine learning classification model using the UCI Breast Cancer dataset (569 samples, 30 features).
- Implemented and compared 5 ML algorithms including Logistic Regression, Decision Tree, Random Forest, SVM, and k-NN.
- Achieved ~97% accuracy using Random Forest and evaluated performance using ROC-AUC and confusion matrix.

Skills

Languages: Python, C++, Java, SQL

AI/ML: Machine Learning, Deep Learning, NLP, Feature Engineering, Model Evaluation, Predictive Analytics

Generative AI: RAG, LLMs, Prompt Engineering, AI Agents, Embeddings, Semantic Search, Vector Databases

Frameworks: LangChain, Scikit-learn, Transformers, Sentence Transformers, Flask

Data Science: Pandas, NumPy, Matplotlib, FAISS, ChromaDB

Tools: Git, GitHub, VS Code, Jupyter Notebook, Kaggle

Core CS: DSA, OOPs, DBMS, Operating Systems, Computer Networks

CERTIFICATES

- Geodata Processing using Python (IIRS, ISRO) - Feb 2024
- AI/ML For Geodata Analysis Indian Institute of Remote Sensing (IIRS), ISRO - Sep 2024
- IU Indianapolis Insights on Computational Data Science (IU Indianapolis) - Nov 2024
- Final Round Qualifier, VIT Bhopal x Johns Hopkins University International Hackathon - Jan 2025
- First prize winner in VIT Bhopal University Hackathon - Feb 2025
